About Course

Anaesthesiology is the medical speciality concerned with the total preoperative care of patients before, during and after surgery. It encompasses anaesthesia, intensive care medicine, critical care medicine and pain medicine.

Skills like airway management and resuscitation that form a basic part of Anaesthesiology training are life-saving procedures and are indispensable in any surgical procedure.

Diploma in Anaesthesia is a 02 years Postgraduate course for doctors in Anaesthesiology. Anaesthesiology is the branch of Medical Science dealing with the study of anaesthesia & related matters including Resuscitation, Pain & Critical Care. The course intends to create specialists who can contribute to high quality health care & advances in Medical Science through Training.

The department is providing regular interactive classes, bed-side clinics, seminars and symposiums as a part of teaching and training programme for these post-graduate students.

Admission to this course is done through the NEET PG entrance exam conducted by the National Board of Examinations (NBE) followed by the online counseling based on score.
